Walla repeaters. The KBARA system has been greatly improved through these endeavors.

Remember to check out the KBARA webpage, www.kbara.org. You'll find lots of interesting and helpful information there. Thanks go to all the officers and supporters of the KBARA repeater system; also to all of you who spend time and money working to keep it all in good working order. Please remember to help support KBARA. Encourage all your Ham friends to use the system and to become part of the supporting network. Don't forget, the repeater fund is always happy to accept any donations.

Have a great holiday season.

President's Corner.....Bob. W7HFI

Hello everyone!

Best wishes for the holidays.

I would like to thank all the owners for your travel and hard work on the KBARA system. Kamiak got a major overhaul. Dan, K7MM, now co-owner of Kamiak, rebuilt the Mitrek repeater and did much needed general maintenance. We also put in new hard line. There is one project still pending; a new antenna and the target date for that is December 20. Hopefully the weather will cooperate. Mark, K7HPT, the new co-owner of the Look Out Pass repeater along with John, W7OE, have installed a different Mitrek repeater at that site. Work has also been done on the Stensgar and Walla

Hamfest !

Thanks again, one & all, for another successful

Spokane Hamfest. At the last meeting at Players & Spectators, we did manage to review this year's event, and make a few plans for next year.

Here's the story on Spokane Hamfest 2008: 523 in attendance, the second highest after Hamfest 1995; profit \$2,622 (2006 was the highest at \$3,192) with return on seed money of 131%; prize money spent \$2,300 (the most

ever); swap tables sold 39 (much lower than normal.....we've been running around 50 in recent year) And finally, the group unanimously agreed to hold next year's ARRL WA State Convention, pending League approval, on September 26, 2009, at **University High School**, with prices all staying the same, with the treasury functions flowing through the IEVHF club's bank account. Dave, K7DWB, has graciously agreed to preside over the Treasury functions again, and yours truly will guide the tiller. Again, thanks all, and we shall keep you posted on the happenings. 73, Betsy, N7WRQ
Spokane Hamfest Chairman, 2008/2009

Comments from various folks about the Spokane Hamfest:

From our League guest Joel, N1BKE:

It's me who should be thanking you - I'm really glad to have had the opportunity to spend the day at the Hamfest - it's a great show, and you're all great people. Glad you had the help you needed - I know how much work goes into these kinds of events, and it's to your credit that everything went so smoothly. I'm going to write to him separately, but Jack, AD7FO, really outdid himself in making Jayne and me feel so welcome - we were treated like royalty! Dinner Friday night was fabulous (not sure who paid, but it wasn't us (it was the Hamfest....N7WRQ), and I hope you'll pass along our gratitude to the appropriate folks). Mike, W7GHZ, brought his own laptop and made sure my PowerPoint was up and running.

After the Hamfest, we decided to see some of the sights in Spokane and wound up having a great time there as well. You live in a great part of the country, that's for sure. Sorry we weren't able to join you for dinner, but it was our only chance to see the area.

I could go on, but I'd better get back to my long-neglected IN box...

Please let me know if I can be of assistance to you and/or the sponsoring clubs at any time.

73, Joel

KBARA Membership / Support Information

The KBARA repeater system consists of several privately owned linked Amateur Radio repeaters. It covers an area from northeastern Washington to northeastern Oregon, and from western Montana to central Washington. The KBARA system is also part of the Evergreen Intertie, an interconnected group of repeaters located in western Washington and Oregon. The primary purpose of the KBARA repeaters is to provide a means for emergency communications within the above areas, and secondarily for routine radio traffic. It makes possible a single system of mobile communications coverage, extending the limited range provided by any single repeater operation.

The KBARA FM repeaters operate in the VHF bands and are linked by UHF radios. The repeaters' frequencies, call signs, locations and owners are as follows:

KB7ARA REPEATERS
